Skills & Competences

Experience

- Responsible to provide direction, timelines, costs and scope for startups, businesses and projects via B2C and B2B in a variety of markets. My services include web design and web development, automated digital marketing, SEO/Adwords, social media marketing and advertising.
- Developing Epic Bridges - Interfaces to communicate with downstream systems in healthcare. Utilizing HL7 standards for data transmittal, customizing code with MUMPS/Cache Programming for Chronicles (EPIC's central database).
- Developed Instagram automation tools via Python, v1.0 was deployed via <https://social.daibuilds.com> with AWS - tested tools with two pilot clients and my own Instagram accounts. v2.0 is currently live at <https://ig4.biz> - It has been released via Google Cloud Services. Technologies and platforms used: HTML5, CSS, JavaScript, jQuery, Python, bootstrap, and web services via Instagram's live API.
- Responsible to provide direction and business development - as well as designing, planning and executing social media marketing and advertising campaigns for our partners & clients. For more information please visit us at www.instagram.com/igerspgh or www.igerspgh.org
- Supported staff, students and faculty members on IT related services for EDMC privately owned universities in the US. for diverse computational needs.
